

NOVA wire rope hoist up to 20t

The Mannheim Team in Germany is now updating the 'Nova' range up to 20t, after SWF's successful launching of the NOVA wire rope hoist-generation.

The revolutionary NOVA wire rope-generation excels itself by:

- ◆ Minor expense in maintenance through a higher wire rope lifetime, lifetime breaks and easy accessible components
- ◆ Exact load positioning due to minor horizontal hook movement
- ◆ Ideal building utilisation by best approach and headroom dimensions
- ◆ Reduced load swing by MicroMove trolley inverter

The range is already available and replaces the SWF FD range completely. Additionally SWF has taken a new 6,3t wire rope in the program. This is a further development of the 5t hoist. We are therefore able to provide a competitive 6,3t wire rope with significantly reduced dimensions.

The progression of the further range is developing as planned. Next year the NOVA range up to 100t will be continued.

To let you know that much:

Never known dimensions will be realized!
